#655726000
\$3.59

Metabo produces leading tools for the metalworking, industrial, construction and renovation industries around the globe. The Metabo name has always stood for high-grade quality products from professionals for professionals.

The Original Slicer is an aluminum oxide wheel used for general purpose applications when dealing with steel and other ferrous metals. This wheel offers a very fast cut rate but continues to stay cool and burr free. The Original Slicer works well with bar stock and sheet metal.

The Slicer Plus Wheels are versatile for heavy duty performance on stainless steel applications. Run these wheels on hard alloys, heavy wall pipe, and angle iron.

The type 27 Original Grinding Wheels are used for a high removal rate on steel, stainless steel, and other ferrous metals.
